BRIEF PROJECT DESCRIPTION:

“Sort of life” is a calendar application for Android devices. As a team we would like to develop a calendar based on to do list and reminders for Android users. The idea is open to new add-ons like budget control, sharing tasks with business purposes.

PROJECT SCOPE:**DESCRIPTION:**

Sort of life makes your life easier. With its minimalist design and task-oriented reminders after this application you will never forget important days.

TARGET AUDIENCE:

Android users who have an email account.

OBJECTIVES:

- Creating personal calendar
- Adding events with reminders
- Adding to do list and follow up the list
- Sharing events via email and WhatsApp

-Synchronizing calendar with other calendar applications.

FUTURE ADD-ONS:

-Adding budget features for business-oriented environments.

-Getting confirmation for daily expenses related the business travels.

-Following expenses and calculating budgets

-Sharing travel expenses with supervisor and accountants.

-Getting documentation as a spreadsheet.

TECHNICAL CONSIDERATIONS:

Login page:

Sharing and synchronizing accounts an email required.

Adding event/to do list/reminder:

The user has to enter inputs as Title, Description/Notes. Event Day, Duration, Starting and Ending time, Location, Set alarm as reminder.

Calendar interface:

Daily: The user sees details on the calendar for a specific day.

Weekly: The user sees an overview of the week

Monthly: The user sees days of the month as a number if there is an event, task or reminder about day numbers appear with different color.

Calendar interface tools:

Share button: The user can share everything on the calendar with others.

Profile page:

The user can change credentials

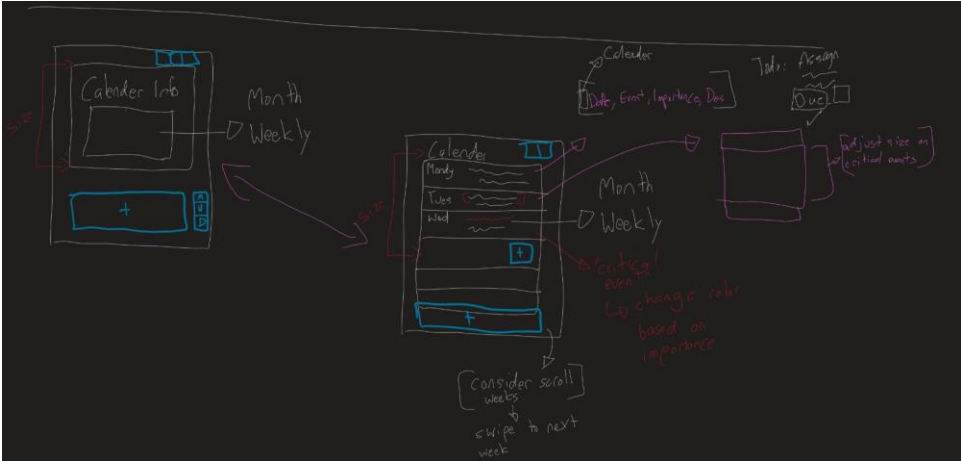

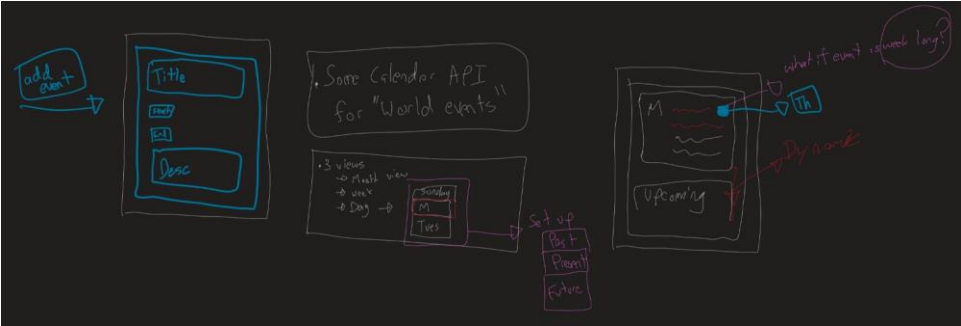

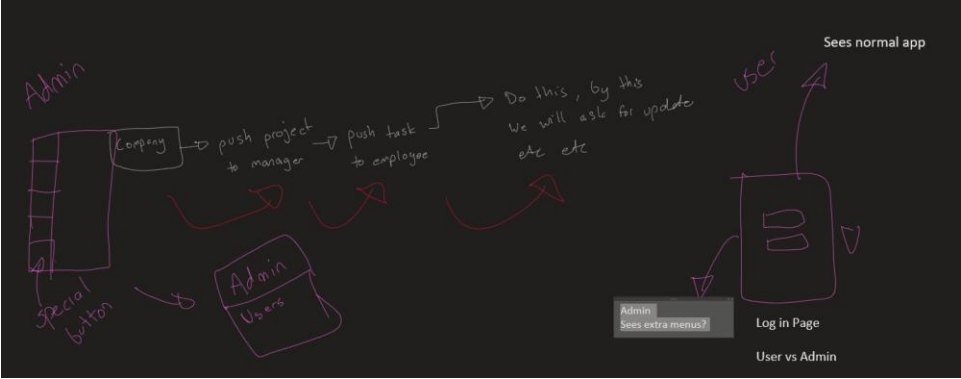

Synchronize sort of life applications with other calendars.

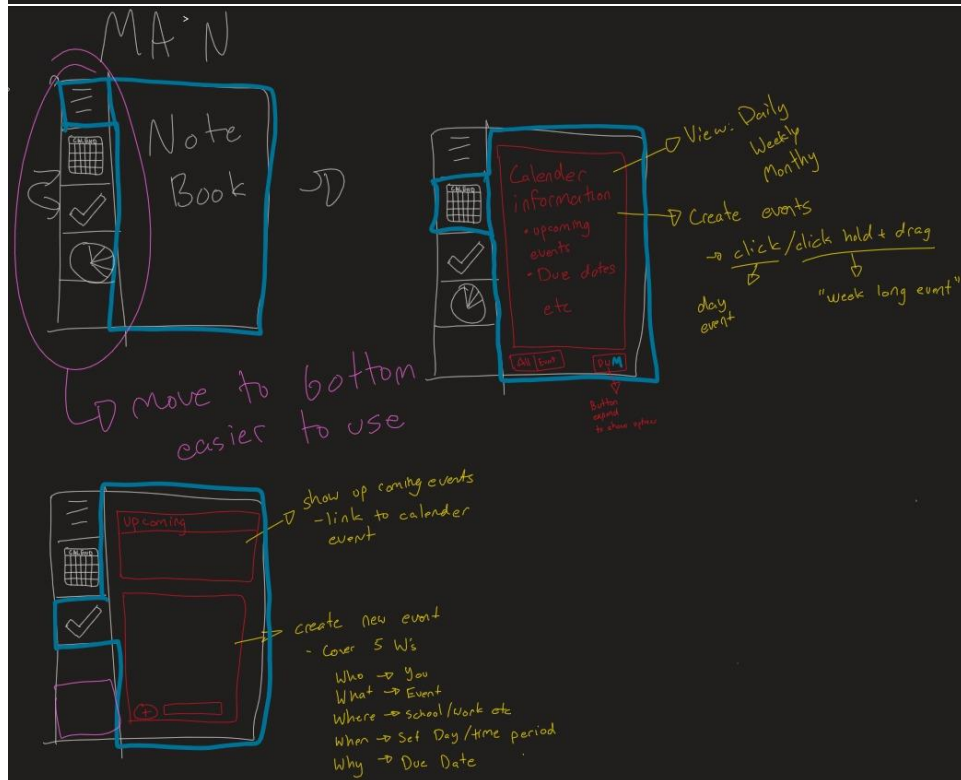

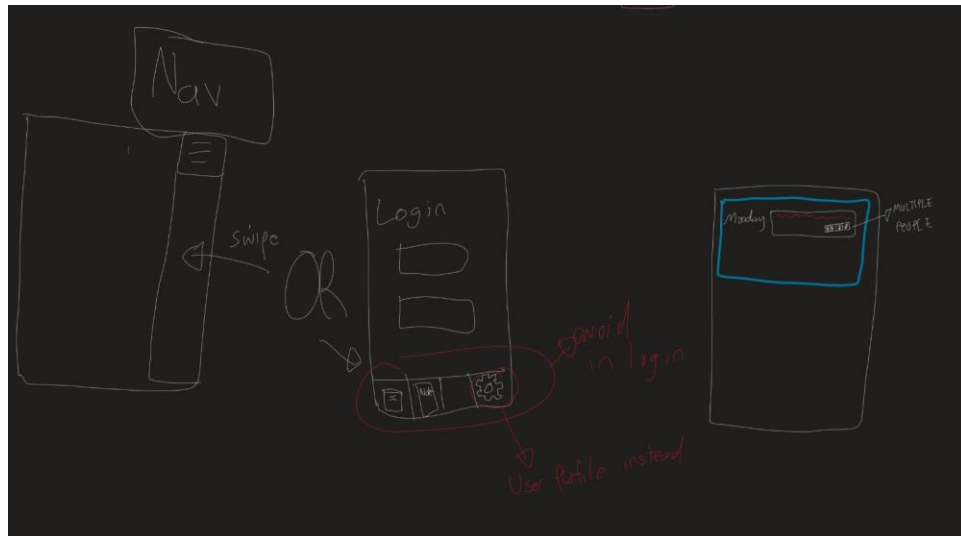

Changing color theme
